It is the potentially large saving you can make from recovering the VAT paid on your expenses; especially considering an average VAT rate of 21% in Europe. THE CASH BACK VAT TECH-FLOW

TECHNOLOGY AND KNOW-HOW

By combining our two companies' data technology, we have succeeded in automating much of the tedious work to recover the foreign VAT on travel expenses. Once you have activated the Cash Back Concur app giving us access to your travel reports and scanned documents, our T&E VAT RETRIEVER collects the data and starts our automatic tech-flow process to claim back your foreign VAT. The big advantage for your company is that you will now get the VAT back on your travel

expenses without any additional administrative work, just by using Concur Expense as you normally do.

We take care of the whole process from start to finish, reducing your travel costs even further by maximising your foreign VAT returns. So make the most of your travel expense management software and join our many clients who have already seized this opportunity, cashing their VAT back on travel expenses.
